

Ledwise Saint

The LEDWISE SAINT flashlight combines a compact size with efficient luminosity of up to 1000lm generated by the CREE XP-L LED. The light beam cannot be adjusted, but its optimal light output offers solid performance regardless. SAINT is a perfect choice for both camping and daily use. The operating switch is located conveniently on the side of the flashlight and can be used to select different light modes:

Turbo/high/medium/low/strobe. The smart electronics ensure sufficient illumination and prevent overheating. The SAINT flashlight has a magnet at one end, which eliminates the need to hold the flashlight in your hand during car repairs, for example. The power source is a 16340 battery equipped with an integrated micro-USB charging port, but the SAINT can also be charged by using the charging port in the body. The product has a two-year warranty, which can be extended to five years by registering it. The battery has a one-year warranty.

Technical data

Product number
1700-AT784

OTF lumens
1000lm

Range
150m

Intensity
4500cd

LED
CREE XP-L

Dimensions
93 x 25mm, light head 25mm

IP class
IPX8

Weight
73g without a battery

Power source/battery
16340 lithium

Frame material
Aluminium

Charging
Micro-USB

Operating times

TURBO / 1000lm / 30min

HIGH / 340lm / 1h 30min

MID / 100lm / 6h

LOW / 3lm / 60h

Package contents

Flashlight, 650mAh battery (16340, Li-Ion), belt case, USB cable, metal clip and an extra O-ring.
