

# Ledwise Scout

LEDWISE SCOUT is a tactical flashlight with a charging connector located in the body. It is suitable for both active use and occasional lighting needs. The flashlight, designed for use by the authorities and hunters, features a CREE XHP35 HD LED that offers luminosity of 2000lm and a range of more than 300 metres. The light beam is both wide and long, providing a hybrid pattern. SCOUT runs on a 3100mAh 18650 battery. The flashlight has two operating switches, one at the end and the other on the side. In addition, there is a trigger switch at the end for the tactical strobe mode, for example. Despite its performance, SCOUT is extremely light, weighing only 130g without a battery. The flashlight can also accommodate other 18650-type batteries, but maximum luminosity is achieved with the 3100mAh battery supplied with the flashlight or with a Ledwise 1700-AT795 3400mAh battery. The product has a two-year warranty, which can be extended to five years by registering it. The battery has a one-year warranty.

## Technical data

**Product number**  
1700-AT785

**OTF lumens**  
2000lm

**Range**  
316m

**Intensity**  
24964cd

**LED**  
CREE XHP35 HD

**Dimensions**  
143 x 26mm, light head 35mm

**IP class**  
IPX8

**Weight**  
130g without a battery

**Power source/battery**  
18650 lithium

**Frame material**  
Aircraft aluminium

**Charging**  
Micro-USB

## Operating times

TURBO / 2000lm / 50min  
HIGH / 400lm / 3h 30min  
MID / 100lm / 12h  
LOW / 10lm / 170h  
STROBO / 2000lm / 1h 40min  
SOS / 100lm / 36h

## Package contents

Micro-USB cable, 3100mAh battery (18650 Li-Ion), an extra O-ring, strap, case, clip, user instructions FI/EN.
