12-36V
6x12W
306 x 73 x 57mm

W-Light Storm auxiliary lights offer supreme lightning power in their price category. Clean white oval shaped beam pattern launches long beam which also nicely lights up the sides of the road. Frameless polycarbonate lens minimizes the dirt, snow and ice stacking on the lens. Because of the lens tech the beam keeps open even in the harshest weather conditions. Lights are equipped with three mounting options: side brackets, top brackets and bottom brackets. Storm lights design is finished with pipe type park light.
