Ref. 30
8000lm
4500K
9-30V
561 x 84 x 89mm
High Power X-Boost LED

X-Vision Genesis offers the most advanced reflector technology on the market. No other light can match Genesis in beam pattern and beam length. Colour temperature has been optimised to be easy on the eye. This gives a whole new level of driving comfort without compromising design. The slightly curved bar design and black reflector have a modern look. The Genesis range consists of three models: Genesis 600, Genesis 1100 and Genesis 1300. Genesis covers vehicles of every size, but 1100 and 1300 have been specially designed for heavy vehicles. The Genesis 1100 and 1300 models feature the Double Up function, which doubles the illumination.
